VirtuGuard™

Additional Service Offerings

Comprehensive Security Assessments

An inspector will evaluate layers of physical and procedural security and develop a detailed report and recommendations.

Trained in critical infrastructure by the U.S. Department of Homeland Security, our security assessment experts have 20 years of experience in vulnerability assessments and reports for facilities of all types and sizes. The cost is determined by the size and complexity of the facility and any travel costs that may be required.

Video Audits

The goal of a Video Audit is to improve business operations and to add significant value to the business. This is done by identifying issues within the business associated with people, processes, and technology that are happening which the business management may not have been aware of so that corrective actions can be taken. Making improvements by using the data delivered in a Video Audit will lead to improved effectiveness and efficiency of a company's operation. VirtuGuard™ can customize a video audit plan for you based on your unique concerns.

Workplace Violence & Active Shooter Training

We can provide in-person or virtual training sessions on workplace violence and active shooter incidents. Training can be provided for almost any business, educational facilities, houses of worship, commercial businesses, and more. One session is one and a half hours, and the cost is determined by location, group size, and other factors.

Telephone Answering Services

VirtuGuard™ Command Centers are equipped to offer a comprehensive suite of services to keep your business running smoothly around the clock. Operators are always available to answer and forward your calls, texts, chats, and other communications. Whether you are a small start-up, a large established business, or anything in between, we don't require a contract, meaning our services can evolve with your business.

VirtuGuard™ offers additional services to further support your business's security and operations. Our solutions are customized for your business and we will never require a long term contract.
